

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

# TABLE OF CONTENTS

|  | PAGE                          |
|--|-------------------------------|
| Nonsymbiotic germination of orchid seeds (with three figures) - - - - -  | <i>Lewis Knudson</i> 1        |
| Yellow-white pine formation at Little Manistee, Michigan (with six figures) - - - -  | <i>LeRoy H. Harvey</i> 26     |
| Formulas for calculating number of fruits required for adequate sample for analysis - - -  | <i>F. E. Denny</i> 44         |
| Uredinales collected by R. Thaxter and J. B. Rorer in Trinidad (with four figures) - - -   | <i>J. C. Arthur</i> 58        |
| Classification of the anaerobic bacteria - - -   | <i>Hilda H. Heller</i> 70     |
| Sulphur as a factor in soil fertility. Contributions from the Hull Botanical Laboratory 289 - -  | <i>John Woodard</i> 81        |
| Cyclic manifestation of sterility in <i>Brassica pekinensis</i> and <i>B. chinensis</i> (with seven figures) -                                     | <i>A. B. Stout</i> 110        |
| The peltate Peperomias of North America (with plates I-IV) - - - - -   | <i>William Trelease</i> 133   |
| Flowers and insects. XXI. Data of anthecology  | <i>Charles Robertson</i> 148  |
| Influence of salts on bacterial activities of soil -   | <i>J. E. Greaves</i> 161      |
| Vascular anatomy of <i>Angiopteris evecta</i> . Contributions from the Hull Botanical Laboratory 290 (with plates V-VIII and eight figures) -      | <i>Hugo L. Blomquist</i> 181  |
| Symbiosis in a deciduous forest. I (with three figures) - - - - -  | <i>W. B. McDougall</i> 200    |
| Effect of temperature on germination of <i>Amaranthus retroflexus</i> . Contributions from the Hull Botanical Laboratory 291 (with four figures) - | <i>Clytee R. Evans</i> 213    |
| Nitrogen fixation in Ericaceae (with four figures)   | <i>M. Cheveley Rayner</i> 226 |

|  | PAGE  |
|--|---|
| <i>Rhizophidium polysiphoniae</i> in the United States.<br>Contributions from the Hull Botanical Laboratory 292 (with ten figures) - - - -         | George W. Martin 236                        |
| Developmental selection in vascular plants (with twenty-eight figures) - - - -   | John T. Buchholz 249                        |
| Biochemistry of plant diseases (with seven figures)  | J. J. Willaman and<br>W. M. Sandstrom 287   |
| Variations in cytology and gross morphology of <i>Taraxacum</i> . I. Contributions from the Hull Botanical Laboratory 293 (with plates IX, X)      | Paul B. Sears 308                           |
| <i>Annularia</i> with <i>Paleostachya</i> fruit (with two figures) - - - -   | Eda M. Round 326                            |
| Cytology of chlorophyll types of maize (with plates XI-XVI) - - - -  | L. F. Randolph 337                          |
| Cultivation of excised root tips and stem tips under sterile conditions (with four figures) - -  | Wm. J. Robbins 376                          |
| Influence of wheat seedlings upon the hydrogen ion concentration of nutrient solutions - - -   | Linus H. Jones and<br>John W. Shive 391     |
| Sulphur and nitrogen content of alfalfa grown under various conditions. Contributions from the Hull Botanical Laboratory 294 - - -                 | E. H. Hall 401                              |
| Variation in cytology and gross morphology of <i>Taraxacum</i> . II. Contributions from the Hull Botanical Laboratory 295 (with nine figures) -    | Paul B. Sears 425                           |
| Anatomy of <i>Equisetum giganteum</i> (with seven figures) - - - -   | Isabel M. P. Browne 447                     |
| Overwintering of tomato mosaic (with plate XVII)   | Max W. Gardner and<br>James B. Kendrick 469 |
| Stroma and formation of perithecia in <i>Hypoxylon</i> . Contributions from the Hull Botanical Laboratory 296 (with plate XVIII and seven figures) | Patsy Lupo 486                              |

|  |                             |

### DATES OF PUBLICATION

No. 1, January 18; No. 2, February 15; No. 3, March 15; No. 4, April 15; No. 5, May 16; No. 6, June 17.

### ERRATA

#### VOL. LXXII

- P. 341, line 5, omit sweet pea  
 P. 372, line 4 from bottom, for most read moist

#### VOL. LXXIII

- P. 62, lines 3 to 5, delete sentence referring the Brazilian rust on *Lygodium* to the genus *Desmella*  
 P. 85, line 4 from bottom, for LIPMAN read LIPMAN and GERICKE  
 P. 87, line 8, for ROBINSON (59, 60) read ROBINSON (59) and ROBINSON, STEINKONIG, and FRY (60)  
 P. 201, line 2 from bottom, for following read preceding  
 P. 223, Fig. 3, for 1.19 read 11.9  
 P. 278, line 10 from bottom, for equal read comparable  
 P. 285, line 2 under Literature Cited, for Am. So. read Ann. Sci.  
 P. 382, Table III, last column, for 0.1240 read 0.0240  
 P. 383, Fig. 3 is inverted, making the legend incorrect as to right and left
